WEBB & BROWN-NEAVES 1978

BATHROOM STYLES *that make a statement*

Your bathroom should be more than functional, it should be a private sanctuary, a place of calm, comfort, and refined detail.

From stone benchtops to designer tapware, generous tiling to thoughtfully placed lighting, the right combination of materials and finishes can transform a simple space into something truly special.

This lookbook showcases inspiration to shape a space truly your own.

TILES

The Foundation of Texture

Tiles are one of the most expressive elements in a bathroom. From bold statement walls to subtle tonal layering, they offer endless ways to shape mood and character. Large-format tiles create a seamless, calming effect, while smaller mosaics or patterned designs can add a sense of craft or personality. The right tile palette can shift a space from spa-like retreat to sculptural showpiece.

TAPWARE

Design in the Details

Tapware is where form and function truly meet. Whether finished in brushed brass, matte black or classic chrome, the silhouette and feel of your fixtures set the tone for the entire space. Minimalist shapes lend a contemporary edge, while more sculptural styles can soften or elevate.

CABINETRY *Smart Storage*

Cabinetry in the bathroom is both a functional anchor and a visual centrepiece. Floating vanities enhance light and space, while wall-hung storage can keep things clean and clutter-free. The choice of finishes, from warm timber to crisp white or soft grey, bringing texture, warmth and cohesion.

LAYOUT

Flow and Function

A well-planned layout makes a bathroom feel effortless. Hobless showers with frameless screens offer a sleek, open look, while thoughtful placement of mirrors, niches, and natural light enhance the feeling of calm. Whether expansive or compact, a layout that flows well allows every design element to shine.
